Zilzila epitsentri yo’nalishini aniqlovchi seysmoskop yaratildi

O’zR FA M.T.O’rozboyev nomidagi Mexanika va inshootlar seysmik mutahkamligi instituti olimlari tomonidan zilzila epitsentri yo’nalishini aniqlovchi seysmoskop yaratildi.

Qurilmadan foydalanishning afzalligi shundaki, u zilzila sodir bo’lganda bir necha soniyalar ichida, zilzila epitsentri qaysi tomonda ekanligini aniqlash imkoniyatini beradi.
